THE PRESIDENT'S MESSAGE.

This document which was given to the country last week contains that little their less of much importance to the general read-er. The message is lengthy, coattaining about fitteen thousand words but Mr. Harrison in all of his suggestions upon the state all the country has evolved untiling me or important on the various subjects touched upon. His policy if he has one is that of a politicism, rather than o attraight lowered Chief executive. On a few subjects his language is annitya and every method of the contraints of the contraints of the contraints of the subjects his language is annitya and attention of the control of the cont man as against the manufacturers of the country. This is clearly in keeping wit his portie's views on that subject, and n one could expect the President to reaso

one could expect the resource.

On the subject of peusions, Mr. Herrison thinks that every man who wore the blue should have a pension, whether he blue should have a pension, whether he controlled the subject of the the

age reader.

If hes been said time and again that the man who kills another in Kentstely is not so agit to be pusished as the one who steals a horse or a burdow kniff. But such is not a lair statement of the result of crimes in lair statement of the result of crimes in the statement of the result of crimes in the statement of the result of the colors most one is much more dreaded than the other. Men are bring convicted in the courts most every day in Kentucky for crime, and it is a said reflection upon one judiciary for the preas and people, to say that no distinction is made in the degree of punishment. Occasionally incompletent rese are put in men that are guilty of a high crime in this state, but stand in we of the consequences Our officers as a rule perform their duty the courts. It is not commendable in an offenders of the law are punished by the courts. It is not commendable in an other than the state of the law are punished by the courts. It is not commendable in an other than the said of the law are punished by the courts. It is not commendable in an other than the said of the law are pusing a how and cry shout the officers of the law, and their failure to do their duty, when we know that such is not often the ceas.

That was a missque Irrington mado on McCrncken's machine shope. Visions of glass works, fire works, factories, powed streets, bit houses and such things, doubt-less passed brough the minds of the citi-zeau up there for a time, but were Irringston must "bide a wee," Cloverport is on to this rucket to stay, and the gentlemen will please not forgot it.

HEXIX M. Stanley, who has been whent three years in the Congo and other unca-pited regions of the great unknown, has critten on open letter to the New York Herald, in which he says be is glad to re-turn to civilization once more. Bits task he says has been a hard one, but he is now measurably happy, and looking hack over what he has accomplished, sees no remon tor discontent.

Gronax H. Thobe, of Covington, Ky has been appointed Third Sergeant a Arms of the Honse of Representatives o Weshington. Fur years ago Thobe schieved some notoriety by running egainst Mr. Corlisie tor Caugress.

The one universal opinion of the Demo-cratic press throughout the country in re-gard to President Horrison's message, is that it is a weak and unimportant docu-ment. Republican papers do not give it eay special praise.

The citizens of Cloverport have every reason to believe that the machino shops to be put here by Major McCracken, will be valuable to them from a husiness point
